

## My Selection and Hackathon Experience at BNP Paribas

After registering for the **BNP Paribas Campus Hiring Process**, I began with the **online assessment round** conducted on the **HirePro platform**.

This round consisted of an **aptitude and technical test** with **40 multiple-choice questions**, followed by **two coding questions** of medium to hard difficulty levels.

After successfully clearing this round, I was **shortlisted for the final stage - the Hackathon**.

### Hackathon Phase (27th–28th): 24-Hour Challenge

The **Hackathon** served as the **final selection stage** for the internship.

It was a **24-hour challenge** held from **27th to 28th**, followed by a **final review session with the jury members**.

I was grouped with **five other members** from different colleges, and we were guided by **two experienced mentors**.

Once the **problem statement** was released, our team quickly strategized and divided tasks efficiently. I took responsibility for the **backend development and integration** aspects of our project.

Throughout the hackathon, our mentors and the business use case owners provided valuable feedback and direction.

By the end of the event, our team successfully completed the project and **presented our solution to the jury panel** with confidence and clarity.

### An Enriching Experience Beyond the Competition

Beyond the technical challenge, the hackathon provided an **incredible overall experience**.

The organizers ensured an energetic and collaborative environment with **excellent facilities, delicious food, and engaging mind-refreshing activities** that kept our spirits high throughout the event.

### Result and Outcome

A few weeks after the hackathon, I received the **official results**. I was **selected for the internship at BNP Paribas**.

This achievement marked a significant milestone in my journey, as it not only validated my technical and teamwork skills but also offered me a chance to learn from an industry-leading organization.

Upon successful completion of the internship, **good-performing interns will be offered a full-time opportunity** based on performance evaluation.
